

HAWTHORN MEDICAL SLEEP MEDICINE

EPWORTH SLEEPINESS SCALE

How likely are you to doze off or fall asleep in the following situations, in contrast to feeling just tired? This refers to your usual way of life in recent times. Even if you have not done some of these things recently, try to work out how they would have affected you.

Use the following scale to choose the most appropriate number for each situation:

- 0** = no chance of dozing
- 1** = slight chance of dozing
- 2** = moderate chance of dozing
- 3** = high chance of dozing

SITUATION	CHANCE OF DOZING
Sitting and reading	
Watching TV	
Sitting inactive in a public place (e.g., a theater or meeting)	
As a passenger in a car for an hour without a break	
Lying down to rest in the afternoon when circumstances permit	
Sitting and talking to someone	
Sitting quietly after a lunch without alcohol	
In a car while stopped for a few minutes in traffic	

INTERPRETATION:

Add all of your scores together from above: _____

0-9 = average score, normal population

10-24 = sleep specialist advice recommended
